

TOWN OF CLARKE'S BEACH–PUBLIC NOTICE
NOTICE
PROPERTIES CONNECTED TO TOWN SEWER SYSTEM

Please be advised that there has been ongoing issues with wipes etc being flushed down toilets causing our lift pumps to be clogged. This is a serious problem that can lead to backups, overflows and damage to our wastewater system. It can also cause problems in property owners homes.

Town is also incurring more costs in having to replace pumps and extra maintenance due to the system being clogged

We are advising that wipes of any kind (including flushable wipes, baby wipes, paper towels, pampers) SHOULD NOT BE FLUSHED INTO THE TOWN SEWER SYSTEM ! ONLY TOILET PAPER & HUMAN WASTE SHOULD BE FLUSHED.

Please help us maintain our wastewater system and prevent costly repairs by disposing of wipes & other non-biodegradable items in the trash.

Your CO-OPERATION is greatly appreciated. Let's work together to keep our Town's infrastructure running smoothly.

Thank you for your attention to this matter.

Please share this announcement to help get the word out!!!
